1. VPN Client

SoftEther VPN Client is a free and open-source software that provides flexible and customizable virtual private network (VPN) solutions. It supports various protocols such as L2TP/IPSec, OpenVPN, and SSL/TLS. The SoftEther VPN Server is used to establish and manage these connections. SoftEther VPN supports Windows, Linux, and macOS operating systems.

SoftEther VPN is suitable for both small and large enterprises as well as individual users. It offers a range of features such as IPsec, L2TP/IPSec, and OpenVPN protocols, which enable secure communication over the internet. The software is designed to be user-friendly, making it easy for even non-technical users to set up and manage their virtual private networks.

SoftEther VPN is available for free download from the official website. It is also open-source, which means that developers can contribute to its development and create customizations as needed. This makes it a popular choice for organizations looking for a cost-effective and reliable solution for their virtual private network needs.
2. VPN Server
